Shamcher Bryn Beorse

EVERY WILLING HAND: COMMUNITY, ECONOMY, AND EMPLOYMENT

*Through **Every Willing Hand** we glimpse an extraordinary worldview, a simultaneous multitude of intimate interconnection. A contemporary mystic, Shamcher Beorse views this vast scene through a lens of economics and full employment. He reveals artfully interwoven themes that all work together to show a complex picture of the forces and influences at play, including visualization, intuition and meditation.*

Shamcher had great compassion for those who are “half awake in the body of humanity,” and he worked tirelessly to expand horizons for all individuals and communities. In one glance the book reflects innumerable facets of our social communities and individual aspirations, all in the context of the need for social reform. Where does he suggest this reform comes from? Not from a revolution in the streets to restore or establish fair and equal opportunity, but from an implemented program ensuring full employment for all who want it.

Bryn Beorse (Shamcher) (1896-1980) authored many non-fiction books, novels and articles, covering topics of energy, economics, full employment, and global awareness as well as yoga and Sufism. He worked and travelled in over 65 countries from Norway to Borneo. Sent on a UN economic mission to Tunisia in the 1960's, helping to rebuild the Norwegian economy after WWII, Beorse also spent time in exploration, travelling to the Kumbha Mela in India, living on the beach in the dunes of Oceano, and going to China at the time of the revolution. A spy in WWII, he was part of the plot to kidnap Hitler. He was an advocate of the giro-credit economic system, and he often spoke out against the stagnation of hierarchical organization. In the 1920s, Shamcher became a pupil of the great Sufi teacher, Inayat Khan, and was instrumental in developing Sufi centres throughout the world. He devoted the last years of his life to promoting OTEC, Ocean Thermal Energy Conversion, the source of benign solar power from the sea.
